My contribution - plan

- My work is to fix bug (Bug 1127139)

  - BounceAnimator (for making fine-tuned bounce animations) is not proper Animator so it cannot be chained with an AnimatorSet

  - Changing BounceAnimator to a BounceAnimatorBuilder should fix this issue

My contribution - result

▶ 1st attempt to build in VM (i3, 4GB RAM)

  -> failed after 2.5 hours of compiling on memory

▶ 2nd on Linux machine (i7, 8GB RAM, SSD)

  -> built in 17 mins

▶ Bug fixed according to plan, tested on my phone

▶ 3 patches created, the last one accepted and added to project by mentor

My contribution - experience

▶ The worst part == machine setup and first build

▶ Good mentor

▶ Fast communication (patch review in 2 days)

▶ Once you prove yourself -> work added (beyond original request)

Thank you for your attention
