Absolutely! I will review and help you test it too.

Please also see and consider my comment on the related ticket: #328

"it would be nice if we could bind wheel movements and ctrl+wheel movements to any action or macro, like we can with other keystrokes."

start here: http://www.jedit.org/?page=devel

There are links to all of the trackers from that page.

Step 1 is to browse through the open bugs and feature requests, and see if there is something you'd like to tackle. Then submit a patch for it.
